

# ASSURED FACIAL PROTECTION CAN BE AS EASY AS 1,2,3

From standard and fluid resistant masks, to particulate filter respirators, eyewear, and face shields, Halyard offers a broad range of styles, features, and levels of protection. Halyard face masks are the choice of more healthcare professionals where comfort and protection are needed in a variety of tasks and procedures.

## HALYARD LEADS THE WAY IN ASTM-RATED PROTECTION

Halyard, a world leader in face masks offers products that meet the ASTM F2100-11 standard at all levels. This helps you make sure you're protected appropriately for the fluid risk that may be present. You can, at a glance, pick the right mask for the task. It's as easy as 1-2-3.

ASTM International is a voluntary standards development organization whose work covers 15 industries, ranging from energy to chemicals to medical devices. ASTM F2100-11 is recognized by the FDA as the standard for medical face masks.

# FIVE CRITICAL TESTS ONE NEW STANDARD

## ASTM F2100-11

ASTM recently issued new guidelines for performance of medical face masks, including a requirement for fluid resistance and particulate filtration for even a Level 1 mask. ASTM F2100-11 standards also call for mask packaging to be clearly labeled with the level of protection in one of three levels: 1, 2 or 3. This new standard reinforces the importance of labeling to identify protection level, based on fluid resistance, filtration and breathability. This greatly simplifies the process of mask selection.
